

Compliance Challenge

Awarded to the team that responds best to a challenge testing their understanding of compliance requirements and their ability to apply and resolve them in practice.

Supported by:

“The BHBIA’s Ethics & Compliance Committee is pleased to support the BOBI Compliance Challenge. We are keen to encourage and recognise excellence in compliance, so we are delighted to offer the chance to take part in a BOBI Award that celebrates knowledge in this area and a practical approach to applying it to healthcare business insights.”

Finalists:

About the Compliance Challenge

The biennial Compliance Challenge continues to shine a spotlight on one of the most critical areas of healthcare business insights. It provides a platform for teams to demonstrate not only their knowledge of ethics and compliance, but their ability to apply it in a practical, commercially relevant way.

Entrants were tasked with stepping into the role of the BHBIA’s Ethics Advisor, responding to a range of realistic compliance scenarios and clearly justifying their decisions. This format tests both technical understanding and the ability to navigate complex, real-world situations with confidence and clarity.

This year’s challenge highlighted the importance of strong compliance expertise and the need for clear, practical application in an increasingly complex environment. As always, the bar for this award remained high, with recognition reserved for those submissions demonstrating the strongest levels of accuracy, judgement and relevance.

The BHBIA extends its sincere thanks to the Ethics & Compliance Committee for developing and judging the challenge, and to all entrants for their contributions.
